📁 PROJECTS

React Validation Registration Form app 🔗

A React registration form with real-time validation for essential user inputs. Includes fields like name, email, password, and other configurable inputs. Client-side validation ensures required fields are filled correctly before submission. Checks email format and enforces password rules for data accuracy.

Javascript Notes App 🔗

A simple and intuitive notes web app to create, organize, and manage your notes with folders like Calendar, Archive, and Trash. Technologies Used: HTML, CSS, Bootstrap, JavaScript.

My Portfolio 🔗

A personal developer portfolio showcasing my skills, projects, and experience. Built with modern web technologies for a responsive and interactive user experience. Highlights include featured projects, a skills section, and contact links. Designed to present my professional journey and technical expertise.

Git Profile Explorer 🔗

GitHub Profile Explorer is a simple web application built using **React**, **TypeScript**, and **Vite** that allows users to search for GitHub profiles using the [GitHub API](#) 🔗. The app displays the profile details, including the user's avatar, name, bio, location, and more.
